ABOUT AUTHOR

PREFACE

"Well, if you have made it this far, there are three possibilities: a) You have bought this thing, then of course you are one of my favorites; b) You are a freeloader and managed to get one of the copies, in that case, you, me, and most of my friends will meet again in the piracy section of hell; and, lastly, c) You are reading the preview or somehow got hold of this page only; then you are a potential reader, and I won't say anything about you, I like not to take flying arrows.

Despite having explored Artificial Intelligence, machine learning, Industry 4.0 , IOT, 5G, and all other state of the art technologies, there was no way I could add a laugh track to it, So basically, I am left at the mercy of your imagination, and if you lie at the ends of the spectrum of humor, i.e., too lame or too good, I like to think I will do fairly well.

To be honest, it's really a tricky section to write. Given the genre, I am supposed to write something hilarious right away, but at the same time, I can't be cocky, as that might put off my potential readers on the first page itself. So, basically, I can't be a class clown, but rather I have

to sound like a clown with class. But as I am just too laid back for all this mental work, I will just try to make coherent sentences till I reach the end of this page and just hope you make it to the end of the of page as well.

This is the part where generally writers talk about support from friends, family, colleagues, publishers, etc., and as I have gotten little to no support from anyone, I am only going to talk about myself, how amazing I am, and how self-obsessed pathetic people around me are. Just kidding, I am not going to do that, so I will just skip this part and jump to the most important part, i.e., "Mutual fund investments are subject to market risk." Equivalent of the book world: "All of the characters in this book are made up, and any resemblance to any of these characters with any breathing or non-breathing human being around you is purely coincidental." Though in reality none of the characters and events is entirely fictional in nature but since I love this phrase too much, I will proceed with it anyway.
